

NB Shashank

Data Analyst | Python | SQL | Tableau | Machine Learning

sshashanknb@gmail.com | 8660658739 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in SQL, Python, and Tableau. Proficient in data cleaning, exploratory data analysis (EDA), data visualization, and statistical analysis. Skilled at building interactive dashboards and translating complex datasets into actionable business insights. Experienced with machine learning workflows, predictive modeling, and data-driven decision making.

TECHNICAL SKILLS

Languages: Python, SQL, Java, C#

Data Analysis & EDA: Pandas, NumPy, SciPy, Data Cleaning, Data Wrangling, Feature Engineering, Statistical Analysis, Hypothesis Testing

Data Visualization: Tableau, Matplotlib, Seaborn, Power BI (Basic)

Machine Learning: Scikit-learn, Random Forest, XGBoost, Predictive Modeling, Model Evaluation, Cross-Validation

Databases: PostgreSQL, MongoDB, SQL Query Optimization, Indexing

Tools: Git, Azure DevOps, Flask, React, Node.js, REST APIs, GitHub CI/CD, SonarQube

WORK EXPERIENCE

L&T; Technology Services

Bangalore

Associate Data Analyst / Software Engineer

Sept 2025 – Present

- Optimized complex **SQL queries** and indexing strategies, improving data retrieval performance by **20–30%**, reducing report generation time significantly.
- Performed **data cleaning**, **data wrangling**, and preprocessing on large structured datasets to ensure data quality and readiness for analysis.
- Conducted **exploratory data analysis (EDA)** using Python (Pandas, NumPy) to identify patterns, trends, and actionable business insights.
- Created **analytical reports and data visualizations** to communicate findings to stakeholders, supporting data-driven decision making.
- Collaborated cross-functionally to improve **data pipelines** and overall data handling efficiency.

L&T; Technology Services

Bangalore

Data Analyst Intern

Feb 2025 – June 2025

- Performed data preprocessing including handling missing values using **imputation techniques**, improving dataset completeness.
- Wrote and optimized **SQL queries** for data extraction and reporting, enabling faster turnaround on business reports.
- Conducted data analysis using **Python (Pandas)** to derive insights and support team reporting needs.

PROJECT WORK

a) Cybersecurity Threat Detection Analytics System (2025)

- Developed an ML-based threat detection system using **Scikit-learn** and **Random Forest**, achieving **94% accuracy** in detecting malicious network activity.
- Performed **EDA** on network traffic logs to identify attack patterns, behavioral anomalies, and feature importance.
- Built a **Flask** web application for real-time prediction, deployed on Render with **GitHub CI/CD** integration.

Technologies: Python, Flask, Scikit-learn, XGBoost, Pandas, NumPy, GitHub CI/CD

b) Customer Sales Analytics Dashboard — Tableau (2025)

- Designed an interactive **Tableau dashboard** tracking **Total Sales: 10.67M** and **Total Profit: 1.8M** across regions, product categories, and monthly trends.
- Performed end-to-end **EDA** using Python (Pandas, Matplotlib, Seaborn) on a 50,000+ row retail dataset, identifying key revenue drivers and regional performance.
- Implemented **SQL queries** to extract and aggregate data from PostgreSQL; dashboard enabled drill-down into KPIs — revenue by region, top products, and category contribution.

Technologies: Tableau, Python, Pandas, Matplotlib, Seaborn, PostgreSQL, SQL

EDUCATION

University BDT College of Engineering — B.E. in Computer Science and Engineering

Dec 2021 – June 2025

CGPA: 8.56/10 | Davangere, Karnataka
